

Custom software

When you can't quite find what you want, we can build it from scratch.

DESIGN | BUILD | PROMOTE

Got your own ideas? Go your own way.

Go fully custom and work your own way

Tell us what you need and we will work with you to ensure that your project is a success. Whether you want to use one of our existing applications as a starting point or you have an idea for a new business system that suits your specific needs we can help.

Experience is still a rare commodity

Managing Director Tony Gorham is a Microsoft Certified Solutions Developer with over 21 years of experience developing business systems. His many roles have included project manager, developer, business owner, marketer, sales person, designer, software architect and mentor. Describing himself as a serial entrepreneur he has a track record of successful development projects and always brings a sense of passion and a "can do - will do" attitude.

We are there for the long haul

The aim of Polychrome is to become a part of your team. We don't want to sell a product or service and then walk away; we want to build a long term relationship. Our goal is to help you to apply IT in your company from a business view point.

We don't want you to have a system just to cross an item from your to do list. Every system must be able to **demonstrate a return on investment**.

Every system must solve real problems and most of all; it must improve the everyday lives of the people who use it. We will bring in the right people to ensure that you get results not just software.

Hence our aim is simple, to provide *simple solutions for complex problems*.

Get more done, in less time

We specialise in making IT happen. We care about your success and are in this as a partner for the long haul, not a quick sale.

We guarantee our work and offer a fixed price on everything we do, so there are no nasty surprises.

We have a range of existing solutions to leverage from and reduce your costs but we are also able to develop a custom solution from scratch.
